

**Industry leading
uPVC paint**

Zebra-Coat

Zebra-Coat is an industry leading uPVC paint which has been specially reformulated for industry and manufacturing.

It is hard-wearing, dries in 15 minutes and is a cost-effective alternative to foils.

Zebra-Coat has exclusively partnered with Surface13 to become the first of its kind uPVC paint to offer an anti-microbial coating option which protects against SARS-CoV-2.

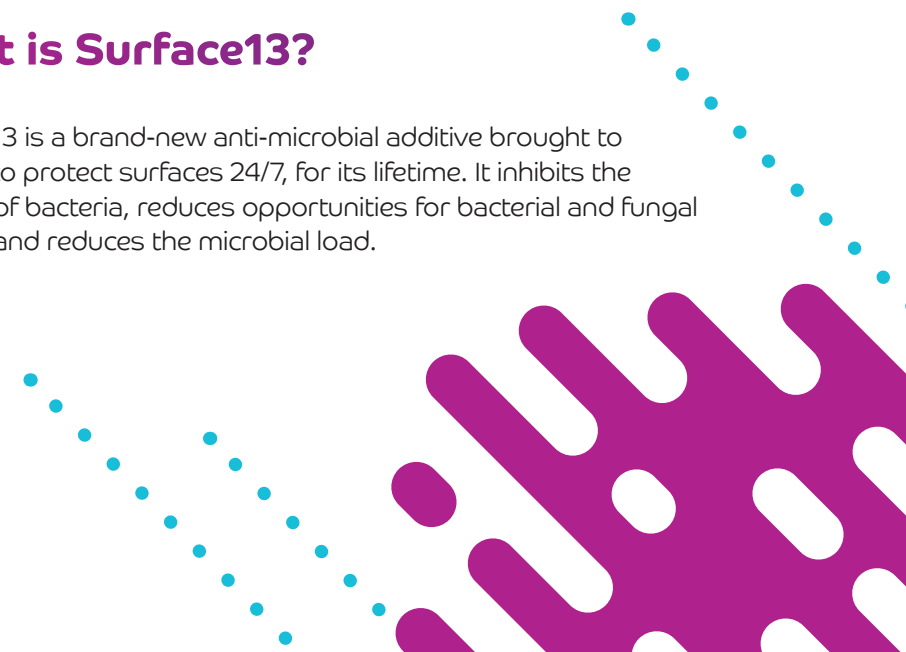

Our uPVC coating gives tradesmen the confidence to repaint and refresh existing surfaces to a high, long-lasting standard. Zebra-Coat is tested to British Standard and adheres directly to aluminium, PVC, Composite doors, kitchen cupboards and more.

Features & Benefits of Zebra-Coat

- Hard-wearing & fast-drying – dries in 15 minutes
- Comes in an endless amount of colours
- Bespoke colour mixing and matching available
- Comes with a 10-year manufacturer's warranty
- Available in a range of sizes from 1ltr to 1000ltrs
- Adheres to multiple substrates including aluminium, PVC, composite doors, kitchen cupboards and more
- Is the only uPVC coating with Surface13 additive option

What is Surface13?

Surface13 is a brand-new anti-microbial additive brought to market to protect surfaces 24/7, for its lifetime. It inhibits the growth of bacteria, reduces opportunities for bacterial and fungal growth and reduces the microbial load.

aerosols direct

Beyond Surface Solutions

Zebra-Coat is part of the BSS Group of high-quality surface, coating and refinishing products.
